NOTICE RESPECTING NON-GAAP MEASURES

Distributable Income (“DI”), Property Net Operating Income (“Property NOI”) and Funds from Operations (“FFO”) are non-GAAP measures commonly used by Canadian income trusts as an indicator of financial performance. “GAAP” means the generally accepted accounting principles described by the Canadian Institute of Chartered Accountants which are applicable as at the date on which any calculation using GAAP is to be made.

Artis REIT calculates Distributable Income, or “DI”, to reflect distributable cash which is defined in the REIT’s Declaration of Trust as net income in accordance with GAAP, subject to certain adjustments as set out in the Declaration of Trust, including: (i) adding back amortization (excluding leasing costs) and accretion to the carrying value of debt and (ii) excluding gains or losses on the disposition of any asset, and (iii) adding or deducting other adjustments as determined by the Trustees at their discretion. Given that one of the REIT’s objectives is to provide stable cash flows to investors, management believes that DI is an indicative measure for evaluating the REIT’s operating performance in achieving its objectives.

Artis REIT calculates Property NOI as revenues, prepared in accordance with GAAP, less property operating expenses such as taxes, utilities, repairs and maintenance. Property NOI does not include charges for interest and amortization. Management considers Property NOI to be a valuable measure for evaluating the operating performance of the REIT’s properties.

Artis REIT calculates FFO, substantially in accordance with the guidelines set out by the Real Property Association of Canada (“RealPAC”). Management considers FFO to be a valuable measure for evaluating the REIT’s operating performance in achieving its objectives.
